Gentlemen:

SUBJECT: Westinghouse LOCA/ECCS Methodology Topical Reports and Control Element Assembly Ejection Analysis Report for Fort Calhoun Station

Omaha Public Power District (OPPD) is enclosing twenty-three (23) copies each of the proprietary (WCAP-13027) and nonproprietary (WCAP-13028) versions of the Topical Report titled "Westinghouse ECCS Evaluation Model for Analysis of CE-HSSS," dated July 1991. Pursuant to 10 CFR 2.790, Westinghouse has determined that Topical Report WCAP-13027 contains proprietary information to be withheld from public disclosure and has provided the enclosed documentation justifying this determination.

Also enclosed is a report titled "Fort Calhoun Unit 1 Control Element Assembly Ejection Analysis Report." OPPD committed to provide these reports in items 1 and 3 of Reference 2. As Mr. T. G. Therkildsen (OPPD) indicated to Mr. W. C. Walker (NRC Project Manager) in a telephone conversation on July 30, 1991, OPPD discovered input errors in the Cycle 14 Small/Large Break LOCA Analysis (item 2 of Reference 2) and must delay submittal of that report until September 1991.
