Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Braidwood Station Units 1 and 2
Draft Annex to GSEP
NRC Docket Nos. 50-456/457

Dear Mr. Denton:

The Enclosure to this letter provides an uncontrolled draft copy of our Braidwood Station Annex to the Commonwealth Edison Generating Stations Emergency Plan (GSEP) for your information and review. NRC Staff review of this information should allow for partial closure of Outstanding Item No. 6 in the Braidwood SER.

The enclosed draft Braidwood Annex, Revision 0 dated September 1983, has undergone an initial on-site review. However, two major portions remain to be completed as follows:

- 1) Emergency Action Levels (Table BWA 5-1)
- 2) Evacuation Time Estimates (Figure BWA 6-2)

At this time, we anticipate completion of these efforts by the end of July, 1984. The Braidwood Annex will be incorporated into the controlled copies of the Commonwealth Edison GSEP as soon as practical to do so. This will be accomplished upon completion of the above initiatives and off-site review of the completed Braidwood Annex. At this time, we envision distribution in September, 1984.

Please address any comments or concerns that you or your staff may have regarding the enclosure or our schedule for completing the Braidwood Annex to this office.

One (1) signed original and fifteen (15) copies of this letter with Enclosure are provided for your use.

Very truly yours,

E. Douglas Swartz
Nuclear Licensing Administrator
