U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. Harold R. Denton, Director

Dear Mr. Denton:

SUBJECT: Grand Gulf Nuclear Station
Units 1 and 2
Docket Nos. 50-416 and 50-417
License No. NPF-13
File 0260/L-860.0
Inclusion of Post Accident
Instrumentation in Technical
Specifications
AECM-84/0306

During discussions with Mr. Marty Virgilio of your staff on Technical Specification Problem Sheet (TSPS) 374, it was requested that Mississippi Power & Light Company (MP&L) confirm that appropriate Category 1 post accident instrumentation is included in the Grand Gulf Nuclear Station (GGNS) Technical Specifications.

MP&L provided information regarding the compliance of GGNS with Revision 2 to Regulatory Guide 1.97 in letters AECM-82/317 (dated July 15, 1982) and AECM-82/563 (dated November 29, 1982). A review has determined that all Category 1 post accident instrumentation identified in those letters is included in the current GGNS Technical Specifications.

Yours truly,

Sam H. Hobbs
Manager of Nuclear Safety
and Compliance
