Annual Operating Report, FY 90-91
PSBR Technical Specifications 6.6.1
License R-2, Docket No. 50-5

November 25, 1991

U. S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D. C. 20555

Dear Sir:

Enclosed please find the Annual Operating Report of the Penn State Breazeale Reactor (PSBR). This report covers the period from July 1, 1990 through June 30, 1991, as required by technical specifications requirement 6.6.1. Also included are any changes applicable to 10 CFR 50.59.

The Safety Analysis Report applicable to this license was amended during the reporting period (April 19, 1991) for two reasons. First, it describes the new reactor control system that was installed in August and September 1991 (the subsequent reporting period). Second, it incorporates changes so as to update the SAR as of the date of the amendment.

A copy of the Thirty-sixth Annual Progress Report of the Penn State Radiation Science and Engineering Center is included as supplementary information.

Sincerely yours,

Marcus H. Voth
Director, Radiation Science
and Engineering Center
