

Federal Emergency Management Agency

Washington, D.C. 20472

JUL 20 1995

Mr. R. Lee Spessard, Director
Division of Technical Support
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Spessard:

Enclosed is a copy of the final report for the April 12, 1995, ingestion pathway drill of the offsite radiological emergency response plans site-specific to the WNP-2 Nuclear Power Plant. The Counties of Adams, Grant, Walla Walla, and Yakima in Washington participated in the drill. The final drill report was prepared by the Region X staff of the Federal Emergency Management Agency (FEMA). The FEMA Region X staff will forward a copy of the report to the State of Washington.

The purpose of the drill was to evaluate the capabilities of Adams, Grant, Walla Walla, and Yakima Counties to carry out emergency response functions in the ingestion pathway emergency planning zone.

No Deficiencies were identified, however two Areas Requiring Corrective Actions were identified during the exercise. FEMA Region X staff will monitor the status of corrective actions.

If you should have any questions, please contact Dr. Anne Marie T. SuPrise, Chief, State and Local Regulatory Evaluation and Assessment Branch, at (202) 646-4065.

Sincerely,

O. Megs Hepler, III
