Subject: Docket No. 50-362
Licensee Event Report No. 84-009, Revision 1
San Onofre Nuclear Generating Station, Unit 3

Reference: Letter, J. G. Haynes (SCE) to USNRC Document Control Desk,
dated March 30, 1984, Licensee Event Report No. 84-009

The referenced letter provided the required 30-day Licensee Event Report (LER) for an occurrence involving the Containment Spray System. In that letter, we reported that the required procedural revisions would be completed by June 4, 1984. However, due to an increase in the scope of these revisions and the need to place several licensed personnel working on these revisions in an accelerated requalification program, they will not be completed until July 2, 1984. Additionally, training as described in the referenced letter will be completed by July 9, 1984, rather than July 2, 1984. All other corrective actions identified in the reference will be completed as scheduled. Enclosed is LER 84-009, Revision 1.

If you require any additional information, please so advise.

Sincerely,

JG Haynes / J. G. Haynes

Enclosure: LER No. 84-009, Revision 1
