MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Monticello Security Plan Change, Revision 36

We are submitting four copies of Revision 36 to the Monticello Security Plan. Revision 36 contains a completely rewritten Security Plan. This revision was written per the guidance contained in NUREG 0908. The revised plan removes ambiguities and clarifies security requirements. This revision will be easier to use and improve compliance. We have expended a great deal of effort preparing this revision. Gary Pirtle, Region III, and Barry Manili have provided a great deal of guidance to us by reviewing drafts of this plan. Our hope is that the new revision will be easier for us and the NRC to use.

These changes do not decrease the effectiveness of the Security Plan and are being submitted pursuant to 10 CFR Part 50, Section 50.54(p).

Due to the magnitude of this change and the creation of new implementing procedures, implementation will not take place until February 17, 1992. Training of the Security Force on the new implementing procedures has been conducted. The Training and Qualification Plan is also being revised to clarify training requirements for the Security Force and incorporate changes resulting from Revision 36. This change to the Training and Qualification Plan will be submitted at a future date.

SAFEGUARDS INFORMATION

A synopsis of change identifying the changes made to the last draft at the request of Gary Pirtle is attached. This revision contains no sidebars since it is a complete rewrite of the plan.

The plan contains safeguards information as identified in 10 CFR Part 73. The plan should not be made available for inspection and should not be placed in the public document room.

If you have any questions, please call us.
