Dr. Mario V. Bonaca
System Manager
Reactor Engineering Branch
Northeast Utilities Service Co.
P. O. Box 270
Hartford, CT 06101

Dear Mario:

I am forwarding the final report from the Level 3 Review Board on the review of the Millstone Point Unit 3 Probabilistic Safety Study. This report has been reviewed and agreed to by all members of the Review Board. Speaking for that Board, I want to offer my congratulations on completing an extremely complex study on a very short schedule. The influence of the Northeast Utilities technical and management team in directing and focusing the activities of the broad group of contractors was critical to your accomplishment. If risk assessment technology is to have the effect on the utility management decision process that we all expect, this intimate utility involvement is an absolute necessity.

I wish to express my personal thanks for the efficiency with which you were able to conduct the review process and for the opportunity to support your organization in this important project.

Very truly yours,

Norman C. Rasmussen
Professor of Nuclear Engineering
