Subject: Docket No. 50-482: Response to Request for
Additional Information Concerning Violation
482/9127-01

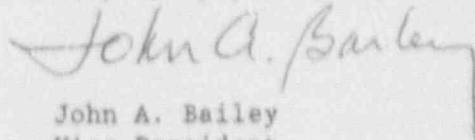

Gentlemen:

The purpose of this letter is to provide additional information concerning violation 482/9127-01 as requested in Reference 1. Violation 482/9127-01 involved five examples of lack of control of the inservice inspection (ISI) plan and associated nondestructive examination procedures.

In Reference 2, Wolf Creek Nuclear Operating Corporation identified that a lack of understanding of the document control system by the ISI engineers was a contributing factor to this violation. The attachment to this letter describes the actions that are planned to be taken to assure that the ISI engineers are cognizant of the procedural requirements for control of ISI plan documents.

If you have any questions concerning this matter, please contact me or Mr. S. G. Wideman of my staff.

Very truly yours,

John A. Bailey
Vice President

Response to Request For Additional Information

Request:

Describe the actions that have been or are planned to be taken to ensure that inservice inspection (ISI) engineers are cognizant of the procedural requirements for control of ISI program plan documents.

Response:

Training will be provided by Wolf Creek Nuclear Operating Corporation (WCNOC) Document Services personnel which will include a discussion of the process for using, storing, and retrieving documents within the WCNOC document control system. This training will specifically cover the process for handling ISI Program Plan and Procedures within the document control system including classification, storage, issuance and retrieval. Additionally, a review of ISI procedures will be performed and changes will be made as necessary to incorporate lessons learned from this training. These actions will be completed by May 29, 1992.

Additional Information:

Changes to the ISI Program Plan and Procedures are included in ISI personnel required reading to ensure that these personnel are kept cognizant of changes which affect ISI activities.
