Gentlemen:

Subject: VIRGIL C. SUMMER NUCLEAR STATION
DOCKET NO. 50/395
OPERATING LICENSE NO. NPF-12
RESPONSE TO GENERIC LETTER 91-11 (LTR 910011)

Pursuant to 10 CFR 50.54(f), South Carolina Electric & Gas Company (SCE&G) is submitting the required response to Generic Letter 91-11 with regard to Virgil C. Summer Nuclear Station (VCSNS).

VCSNS was licensed using Westinghouse Standard Technical Specifications and, as such, has implemented Technical Specification 3/4.8.1, AC Sources, and 3/4.8.3, Onsite Power Distribution, directly from the standard. Also, plant procedures exist which implement and support the limiting condition for operation, action statements, and surveillance requirements of these specifications. Based on a review of the specification requirements against the guidelines of Generic issues 48 and 49 and based on the text contained in Generic Letter 91-11--which states, "The current Westinghouse...Standard Technical Specifications include the requirements contained in this generic letter"--VCSNS has implemented appropriate measures to conform with the guidance provided by Generic Letter 91-11.

I declare that the statements set forth herein are true and correct to the best of my knowledge, information, and belief.

If you have any questions, please call at your convenience.

Very truly yours,

John L. Skolds
