Congress of the United States  
House of Representatives  
Washington, DC 20515

December 18, 1991

Mr. Ivan Selin  
Chairman  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Chairman Selin:

I am writing to formally request an investigation by the Nuclear Regulatory Commission (NRC) into the accident that occurred on Interstate 91 in Springfield, Massachusetts, on December 16, 1991, in which a vehicle transporting radioactive uranium dioxide pellets from Wilmington, Delaware, to the Vermont Yankee nuclear power plant in Vernon, Vermont, was completely destroyed.

While there was no apparent release of radiation from the collision, the accident did raise serious concerns about the transportation of radioactive nuclear materials on our nation's highways. Furthermore, the accident emphasizes the need for a re-examination of the advance notification policy for vehicles carrying nuclear cargo on public roadways.

The frequency with which radioactive nuclear material is transported on our nation's roads is increasing each year. Therefore, in an effort to prevent this type of accident from happening again, I urge you to initiate an investigation into the cause of the accident, and what implications it will have on future transportation of radioactive nuclear materials. I look forward to your response.

Sincerely,

  
RICHARD E. NEAL  
Member of Congress
