Subject: Grand Gulf Nuclear Station
Unit 1
Docket No. 50-416
License No. NPF-29
Completion of Safety Parameter Display System
(SPDS) Modifications

GNRO-95/00103

Gentlemen:

In a letter dated June 11, 1993, (GNRO-93/00064) Entergy Operations, Inc. indicated an anticipated completion date of September 1, 1995 for the incorporation of SPDS modifications, identified during the SPDS verification and validation (V&V), into the Plant Data System (PDS).

The purpose of this letter is to inform you that the SPDS modifications identified by the V&V have been completed and the SPDS fully meets the requirements of NUREG-0737, Supplement 1, taking into account guidance provided in NUREG-1342.

As noted in previous submittals, the outstanding V&V discrepancies did not present major limitations on the operation of the SPDS and did not constitute essential elements for compliance with NUREG-0737, Supplement 1. The modified SPDS has been thoroughly tested in the Grand Gulf simulator and all V&V comments resolved and dispositioned.

Should you have any questions, please contact Wayne Russell at (601) 437-2717.

Yours truly,

CRH
