Subject: Correction to the 1993 Semi-Annual Radioactive Material Release Report for the
Period January 1, 1993 through June 30, 1993
Cooper Nuclear Station
Docket No. 50-298, License No. DPR-46

Reference: Letter (No. NSD93012) to U.S. NRC Document Control Desk from Nebraska
Public Power District dated August 25, 1993, "Semi-Annual Radioactive Material
Release Report"

Gentlemen:

On August 25, 1993, the Nebraska Public Power District (District) submitted to the Nuclear Regulatory Commission (NRC) the Cooper Nuclear Station (CNS) Semi-Annual Radioactive Material Release Report for the period January 1, 1993 through June 30, 1993. In recent communications with the Brookhaven National Laboratory Analytical Sciences Division and in response to an internal nonconformance report on this matter, the District has determined that some information has been omitted from the subject report. Table 3, Subsection A.2, Solid Waste Shipped Offsite for Burial or Disposal, Estimate of Major Nuclide Composition (reference Page A12 of the subject report), is missing a portion of the list of major nuclides. The same table is also missing Subsection A.3, Solid Waste Disposition, and Section B, Irradiated Fuel Shipments (Disposition). Page A12 to the subject report has been corrected and is enclosed for your information and use.

If you have any questions or need additional information, please contact me.

Sincerely,

J. H. Mueller
Site Manager
