RE: Alnor Dewpointer Calibration Extension

OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

FROM: J. M. Wimburn

TO: M. S. Briney

I have temporarily extended the calibration period for the Alnor Dewpointer, VP-2466, to 4/7/90. This is an extension of one month. We have three Dewpointers of which two are out for calibration and will not be returned until the end of March. The Dewpointer is used on the weekly PMs for Instrument Air Dryers and Diesel Generators Air Start Dryers. The commitments 16083 and 14831 associated with the PMs do not require tolerances for the measurement or for the Dewpointers.
