Washington, D.C. 20555

Subject: Draft Regulatory Guide DG-0008, "Applications for the use of Sealed Sources in Portable Gauging Devices"

Gentlemen:

Cooper Nuclear Station has completed its review of the subject document and the following comments are offered for your information and use.

Appendix C, item 8, states, "Ensure that audit results and corrective actions are communicated to all personnel who use licensed material (regardless of their location or the license under which they normally work)."

This responsibility is vague and implies that the Radiation Safety Officer is responsible for all personnel who use license material regardless of whether these individuals are conducting activities associated with the Licensee's Materials License. It is recommended that Appendix C, item 8, be clarified to read: "Ensure that the audit results and corrective actions are communicated to all personnel conducting activities associated with the Licensee's Materials License."

Appendix I, page I-8, item D.(3) refers to "new" NRC Forms 4 and 5. It is recommended that the word "new" be deleted since the subheading for Section D already refers to the "revised" Part 20. Keeping the word "new" in D.(3) may lead some Licensees into believing there are "new" NRC Forms 4 and 5 other than the NRC Forms 4 and 5 already associated with the revised Part 20.

If you have any questions regarding these comments, please contact Bob Beilke at (402) 825-5216.

Sincerely

J. H. Mueller
Site Manager
