RE: EMERGENCY MOTION ON UCLA REACTOR AND UPCOMING OLYMPICS

Dear Chairman Palladino and Secretary Chilk:

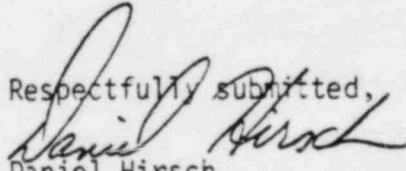

Enclosed please find an emergency motion aimed at getting the irradiated fuel off the UCLA reactor site before the upcoming Olympics to be held a few hundred yards away, given the recent withdrawal of the license renewal application and the unique security risks associated with the Olympics.

Final action by the Commission is necessary by early next week if there is any chance to commence off-shipment preparations and avoid a potentially serious international incident.

CBG therefore respectfully requests the Commissioners be polled today to set up oral argument on this Emergency Motion for Monday or Tuesday, and that representatives of the parties be informed by phone today of Commission action thereon so that travel plans can be arranged. CBG can be contacted at the above numbers; Counsel for UCLA Cormier can be reached at (213) 825-4010 or Christine Helwick or Glenn Woods at (415) 642-2822; Counsel for Staff Woodhead at (301) 491-7452.

I am looking forward to hearing from your staff today. If the matter cannot be resolved by mid-week next week, it may well be too late.

Respectfully submitted,

Daniel Hirsch
President
Committee to Bridge the Gap
