Dr. Thomas E. Murley, Director  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

ATTN: Document Control Desk

Subject: LaSalle County Station Unit 2  
Withdrawal of Request for One-Time Exemption from  
Appendix J to 10 CFR 50, Accelerated Type A Testing Requirements  
NRC Docket No. 50-374

Reference: Letter from P. Piet (CECo) to the U.S. NRC,  
dated October 11, 1991.

Dear Dr. Murley:

In the referenced letter, LaSalle County Station requested a one-time exemption from the need to accelerate the schedule for performing an additional containment integrated leak rate test (CILRT) at LaSalle County Station Unit 2 (LaSalle), as required by 10 CFR 50, Appendix J, Section III.A.6(b). At this time, however, Commonwealth Edison (CECo) wishes to formally withdraw our exemption request from further consideration. We regret any inconveniences this may have caused your staff.

However, CECO still wishes to pursue the companion Technical Specification Amendment for Surveillance Requirement 4.6.1.2, transmitted in the referenced document. It is requested that the processing of this Amendment request proceed as normal.

If there are any further questions or concerns regarding this matter, please direct them to this office.

Sincerely,

Peter L. Piet  
Nuclear Licensing Administrator
