1717 H Street, N.W.
Washington, DC 20555

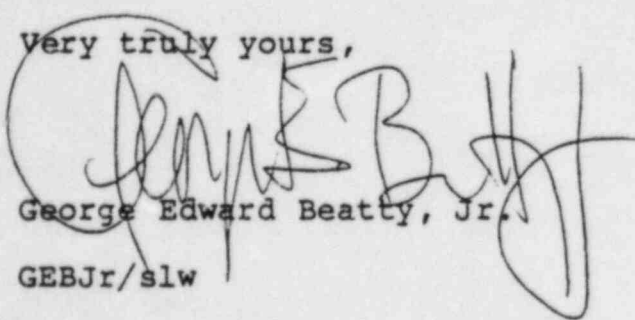

Dear Mr. Glinsky:

The status of the Shoreham Nuclear Power Station is a matter of utmost urgency for both my own community of Shoreham and for the entire Long Island area as well.

I am convinced that the plant has been built and can be operated within acceptable safety limits. I believe the current battle over evacuation plans is more jurisdictional and political than substantive. It is my firm belief that responsible agents of local, state and federal government have an obligation to join forces to resolve this issue.

I am confident that I am in accord with most reasonable Long Islanders who view the abandonment of the Shoreham Plant and the bankruptcy of LILCO as the height of folly. I urge you lend your very best efforts to bring this facility on-line safely and quickly.

Very truly yours,

George Edward Beatty, Jr.
