SUBJECT: McGuire Nuclear Station  
Docket Nos. 50-369 and 50-370  
Proposed Technical Specification Supplement

Gentlemen:

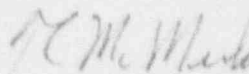

On January 8, 1992, we transmitted proposed license amendments to Appendix A, Technical Specifications, of Facility Operating Licenses NPF-9 and NPF-17 for McGuire Nuclear Station Units 1 and 2 respectively.

The revisions were necessary due to the recent reorganization that Duke Power Company implemented. Based on discussions with the NRC staff concerning these revisions, we are supplementing our changes of January 8, 1992.

Attachment 1 contains the pages showing the proposed Technical Specification change supplements. Attachment 2 contains the summary and bases of the supplemental changes.

If you have any questions concerning these proposed amendments or if additional information is required, please contact R. O. Sharpe at (704) 875-4447.

Very truly yours,

  
T. C. McMeekin  
Vice President
