Re: Illinois Power Company
Clinton Power Station
Docket No. 50-461 - OL

Dear Phil and Allen:

Enclosed for your information is a copy of a letter dated June 20, 1984 which Illinois Power received from Bechtel Power Corporation regarding the proposed Independent Design Review for the Clinton Power Station and Illinois Power's response dated June 22, 1984 to the letter from Bechtel Power Corporation.

Please do not hesitate to contact me if you have any questions.

Very truly yours,

Skip Fox

Subject: Clinton Independent Design Review
Job No. 15478-003
System Selection

Dear Mr. Balar:

In response to Illinois Power Company invitation, Bechtel has addressed the selection of systems for the vertical review aspects of the IDR. We propose review of the following Clinton systems as examples collectively providing sufficient complexity and involvement of engineering and design activities to meet the IDR objectives:

High Pressure Core Spray System
Unit Class 1E A-C Power System

If you have any questions, please contact me.

Very truly yours,

G. L. Parkinson
Project Manager

ILLINOIS POWER COMPANY

CLINTON POWER STATION, P.O. BOX 878, CLINTON, ILLINOIS 61727

Mr. U. L. Parkinson
Project Manager
Bechtel Power Corporation
P. O. Box 3965
San Francisco, CA 94119

Dear Mr. Parkinson:

Thank you for your letter of June 20, 1984, suggesting that the vertical reviews in the Independent Design Review (IDR) of the Clinton Power Station (CPS) should be based on the High Pressure Core Spray System (HPCS) and the Unit Class 1E A-C Power System.

We view it as Bechtel's responsibility to satisfy itself that the scope of the review will enable you to reach an independent determination as to the adequacy of the design of the CPS. We therefore have no objection to your review of the systems you propose if you believe that such selection will better achieve the purpose of the independent design review.

Since it is necessary, however, that your selection of systems to be reviewed also satisfy the NRC, please provide a brief written explanation of the basis for your selection to us and the Director of Licensing, NRC by June 23, 1984, and be prepared to discuss the subject at the meeting with the NRC on June 28.

Sincerely,

A handwritten signature in cursive script, appearing to read "J. D. Gaier".
