Standardization and Special Projects Branch
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Mr. Robert Carter, Project Manager

Reference: Oregon State University TRIGA Reactor (OSTR),
License No. R-106, Docket No. 50-243

Subject: 10 CFR 50.54 (q) report of changes to the OSTR Emergency
Response Plan, which do not decrease the effectiveness of the
plan.

Gentlemen:

We would like to confirm the receipt of your May 17, 1984 letter advising us that the Commission approved the emergency response plan for the OSTR. In keeping with this approval, we have begun the steps necessary to have the plan fully implemented as soon as possible.

Since a period of over one year elapsed during the review process for the OSTR plan, we felt that it would be appropriate to conduct the first of our required reviews of the plan prior to final implementation. As a result of this effort, we concluded that several small changes to the plan should be made, but from our viewpoint none of the changes decrease the effectiveness of the plan. As required by 10 CFR 50.54 (q), the changes are summarized for your information in this report, and three sets of replacement pages are included with this cover letter which will allow you to revise our plan by directly inserting the new pages into your copies.

The changes listed below have been reviewed and approved by the OSTR Reactor Operations Committee. Changes on all pages are indicated by a vertical line in the right margin of the page.

<u>Page No.</u>	<u>Latest Revision Date</u>	<u>Change</u>
3-5	June 1984	Inserted the word 'is' in the last sentence of subparagraph (a).
3-6	June 1984	Revised the wording of footnote (1) to delete the Associate Dean of the OSU Graduate School. Changes since the OSTR plan was originally

		submitted have slightly revised our organization and the SRO, if required at this point in the plan, will regularly come from the Nuclear Engineering Department.
3-10	June 1984	Same as page 3-6.
7-5	June 1984	Revised the wording in subparagraph (c) under 'Continuous-Air-Monitor or Stack Monitor Alarm' to make it more understandable. There is <u>no</u> change in the technical content.
C-1 (Appendix C)	June 1984	Revised the list of Emergency Response Implementing Procedures (ERIP), following a consolidation of these procedures designed to eliminate confusion. The ERIPs now listed individually in Appendix C include only those containing actual emergency response procedural actions. Other supporting procedures of a more routine radiation protection nature are now included collectively in the Radiation Center Health Physics Procedures.
C-2	Original page in plan	Deleted

Should you have questions regarding these changes, please let me know. As requested in your May 17, 1984 letter, we will advise you in writing when full implementation of our plan has been achieved.

Yours sincerely,

C. H. Wang
