Licensing Branch No. 4

Re: Catawba Nuclear Station
Docket Nos. 50-413 and 50-414

Dear Mr. Denton:

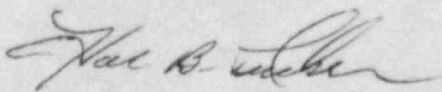

Mr. T. M. Novak's letter of May 25, 1984 transmitted the "Draft" Catawba Unit 1 Technical Specifications. Subsequent letters dated June 8 and 22, 1984 transmitted a number of revised specifications.

As shown by Attachment 1, the Catawba Unit 1 Technical Specifications have been under development for over three years. The development process began soon after the McGuire Unit 1 Technical Specifications were issued on January 23, 1984. Drafts of Catawba Unit 1 Technical Specifications were distributed for review by the station, the Design Engineering Department and Westinghouse. NRC/Region II and NRC/ONRR's Reactor Systems Branch and Instrumentation and Control Systems Branch have each conducted reviews of the Catawba Unit 1 Technical Specifications.

As noted in Mr. Novak's letter, certain items are still under review. A number of proposed revisions have been submitted by Duke Power for inclusion in the Catawba Unit 1 Technical Specifications but have not been included in a formal response from the staff. These include letters dated June 25 (3 letters), June 28, and June 29 (2 letters), 1984. Additional items submitted prior to these letters are listed in Attachment 2.

Based on the extensive preparation and review effort that has gone into the development of the Catawba Unit 1 Technical Specifications, Duke Power Company certifies that, to the best of our knowledge, the "Draft" Catawba Unit 1 Technical Specifications, as revised and subject to incorporation of those items identified above, accurately reflect the as-built plant and the Catawba FSA. Furthermore, we are not aware of any conflicts between the "Draft" Catawba Unit 1 Technical Specifications and the NRC staff's SER analyses.

Very truly yours,

H. B. Tucker
