QA FILE: CP-84-12, SDAR-136
FILE NO.: 10110

Dear Mr. Johnson,

On June 4, 1984 we verbally contacted your Mr. D. Hunnicutt of a deficiency regarding the temperature envelope requirements on the environmental qualification of equipment outside containment for high energy line breaks (HELB).

We are continuing our evaluation and anticipate completion by August 31, 1984.

Very truly yours,
