

J. Phillip Bayne
Executive Vice President
Nuclear Generation

June 29, 1984
JPN-84-41

Director of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Mr. Domenic B. Vassallo, Chief
Operating Reactors Branch No. 2
Division of Licensing

Subject: James A. FitzPatrick Nuclear Power Plant
Docket No. 50-333
NUREG-0737, Item II.K.3.16
"Reduction of Challenges and Failures of
Relief Valves -- Feasibility Study and
System Modification"

Reference: 1. NYPA letter, J. P. Bayne to D. B.
Vassallo, dated June 19, 1984
(JPN-84-39).

Dear Sir:

The Power Authority provided, in Reference 1, an update of our previous responses to the subject item. The purpose of this letter is to amend a statement made in that letter concerning installation of an analog trip system.

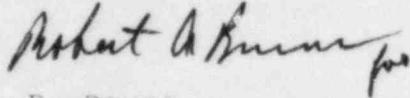

Reference 1 stated that Authority actions to reduce challenges and failures included "the installation of an analog trip system for the Emergency Core Cooling System and the Reactor Protection System." The sentence should have referred to "the future installation." Except for this change, the information provided in Reference 1 remains unchanged.
