Gentlemen:

In the Matter of)	Docket Nos. 50-259
Tennessee Valley Authority)	50-260
		50-296

**BROWNS FERRY NUCLEAR PLANT (BFN) - UNITS 1, 2, AND 3 -
REVISION TO TECHNICAL SPECIFICATION (TS) BASES (TS-371)**

The purpose of this letter is to inform NRC of changes TVA is making to the BFN Units 1, 2, and 3 TS Bases. TVA is revising Units 1, 2, and 3 Bases Sections 3.5.A and 3.5.B, "Core Spray System (CSS) and Residual Heat Removal System (RHRS)," and 3.5.C, "RHR Service Water and Emergency Equipment Cooling Water Systems (EECWS)." This revision will clarify the existing note in TS 3.5.B.11 for the RHR system cross-connect capability and the proposed note being added to TS 3.5.C.3 by TS-361 (submitted on June 2, 1995) for the standby coolant supply capability. Additionally, a statement regarding the Low Pressure Coolant Injection subsystem cross-tie valve is being moved from Units 1, 2, and 3 TS Bases Section 3.5.C to TS Bases Section 3.5.B.

Enclosure 1 to this letter provides the description and reason for these changes. Enclosure 2 contains copies of the appropriate TS Bases pages from Unit 1, 2, and 3 marked-up to show the changes. Enclosure 3 forwards the revised TS Bases pages for Units 1, 2, and 3.

TVA will make the revised TS Bases effective with the issuance of TS-361 by the NRC. If you have any questions about this change, please contact me at (205) 729-2636.

Sincerely,

Pedro Salas
Manager of Site Licensing
