AMENDMENTS TO JULY-DECEMBER 1983  
SEMIANNUAL ENVIRONMENTAL AND EFFLUENT REPORT

Dear Mr. O'Reilly:

Enclosed are amended Tables 1A, 1B, 1C, and 3, reported in the Semiannual Environmental and Effluent Report for Brunswick Steam Electric Plant, covering the period from July 1, 1983, to December 31, 1983.

The corrections made to Tables 1A, 1B, and 1C of this report are as follows:

The H-3, Sr-89, and Sr-90 effluent data was incorrectly reported due to an error in the composite dates of the computer files. The dates in question for this report have been changed, and the revised effluent data is included on the amended tables.

The corrections made to Table 3 of this report are as follows:

1. The number of cubic meters of spent resins, filter sludges, evaporated bottoms, etc., erroneously reported was 4.43E00. The correct value is 4.43E+02. Upon investigating, it was determined that this was a typographical error.
2. The number of shipments to Chem-Nuclear Systems, Inc., was reported as 119. The correct number is 95. Upon investigating, it was determined that the mistake was due to incorrect counting of the shipments.

Please replace the existing tables with the amended tables provided.

Very truly yours,

*Mark Dietz*
