Notary Public

My commission expires:

October 27, 1987

SUBJECT: Offsite Organization, Technical Specification Figure 6.2.1-1,
page 6-3

DESCRIPTION OF CHANGE: Revision of technical specification figure 6.2.1-1 is proposed to reflect a recent change of position title in the Nuclear Production Department. The position of Vice President, Nuclear Support has been changed to Director, Nuclear Support.

JUSTIFICATION: The proposed change will make the technical specifications consistent with the personnel policies of MP&L's Nuclear Production Department. The responsibilities of and qualifications for the position affected are equivalent to those of the other directors' positions in the department. This change will not affect the function of this position or alter the lines of communication or responsibility, but is a change of title only.

SIGNIFICANT HAZARDS CONSIDERATION:

This change is purely administrative in nature and does not involve the reduction of safety margins and does not represent an increase in the probability or consequences of an accident previously evaluated nor is the possibility of a new or different kind of accident from any accident previously evaluated created. Thus the proposed change to the Technical Specifications does not involve a significant hazards consideration.
