Subject: Catawba Nuclear Station, Units 1 & 2, Docket Nos. 50-413 and 50-414  
McGuire Nuclear Station, Units 1 & 2, Docket Nos. 50-369 and 50-370  
Supplement to Proposed Technical Specification (TS) Amendment to  
Reflect Separate Volumes for Unit 1 and Unit 2

By letter dated July 18, 1994, Duke Power Company submitted a proposed Technical Specification (TS) Amendment requesting separate volumes for Unit 1 and Unit 2 at McGuire and Catawba Nuclear Stations. This submittal was discussed with NRC staff on August 15, 1995 at McGuire Nuclear Station. During this discussion, the NRC staff requested additional information in the details of the summary of the proposed TS changes. Since the original submittal, numerous amendments have been issued which are included in this supplement. For clarity, this supplement provides the entire change request with proposed TS pages for both volumes of each unit and a summary of all changes requested along with markups of TS pages.

Attachment I of the original submittal (technical discussion, justification for the proposed changes, and the no significant hazards analysis) are still valid. The enclosed Attachment II provides the proposed TS pages for McGuire Nuclear Station and Attachment III, the proposed TS pages for Catawba Nuclear Station. Attachment IV provides a summary of changes associated with separate volumes including editorial or administrative changes arranged by TS section.

Pursuant to 10 CFR 50.91(b)(1), a copy of this amendment request has been provided to the appropriate North Carolina and South Carolina state official.

Very truly yours,

*M. S. Tuckman*  
M. S. Tuckman.
