Reactor Coolant Vent System
Technical Specification Implementation

By letter dated March 27, 1984 you requested that we notify the Commission upon implementation of the Reactor Coolant Vent System Technical Specifications. In response to that request, this letter is being provided to inform you that the manual isolation valves in the Unit 2 vent lines have been blocked and tagged in accordance with the requirements of Tech Spec 4.18 and that Technical Specifications 3.1.A.5 and 4.18 have been implemented for Prairie Island Unit 2.

The NRC Project Manager for Prairie Island was notified of this implementation by phone on October 3, 1984.

If you have any questions on the implementation of the Reactor Coolant Vent System Technical Specifications on Prairie Island Unit 2 please contact us.
