October 4, 1995

U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D.C. 20555

SUBJECT: LaSalle County Nuclear Power Station Units 1 and 2 Request for  
Extension to Respond to RAI on Second Ten-Year Interval Inservice  
Inspection Program Plan

NRC Docket Nos. 50-373 and 50-374

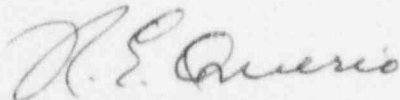

REFERENCE: R. Latta letter to D. Farrar dated 9/1/95, LaSalle County Station,  
LaSalle County Station, Units 1 and 2 - Request for Additional  
Information (TAC Nos. M90704 and M90705)

In the reference letter the NRC Staff issued a request for Additional  
Information (RAI) regarding the 2nd Ten-Year Inservice Inspection Plan,  
Revision 0. In this letter, the staff requested that LaSalle Station respond  
within 60 days of receipt of the letter or November 5, 1995.

This letter is to request an extension of 90 days to the required response  
date. Granting this extension would make the response due on February 3, 1996  
and would allow adequate time for ComEd to complete the research and  
verification necessary to assure that a high quality response is provided.  
LaSalle will submit this Additional Information as revision 1 to the 2nd Ten-  
Year Inservice Inspection Plan.

In communications with your staff it has been established that this extension  
can be granted without a significant impact on the NRC's schedule. If there  
are any concerns in this matter, please contact Mr. Andrew L. Kochis at (815)  
357-6761, extension 2325.

Sincerely,

Robert E. Querio  
LaSalle Site Vice President
