WITHDRAWAL OF REQUEST FOR LICENSE AMENDMENTS  
REMOVAL OF PRESSURE-TEMPERATURE CURVES AND VESSEL SURVEILLANCE  
CAPSULE WITHDRAWAL SCHEDULE FROM TECHNICAL SPECIFICATIONS

Gentlemen:

On June 17, 1994, Carolina Power & Light Company (CP&L) submitted a request for license amendments for the Brunswick Steam Electric Plant (BSEP), Unit Nos. 1 and 2. These proposed amendments would revise the Technical Specifications by (1) removing the heat-up and cooldown curves and relocating the curves to a new Pressure Temperature Limits Report, and (2) removing the reactor vessel material surveillance program withdrawal schedule per the guidance of NRC Generic Letter 91-01. These proposed license amendments are being withdrawn until such time as the proposed Pressure-Temperature Limits Methodology Report can be updated and resubmitted in support of the license amendment requests.

Please refer any questions regarding this submittal to Mr. George Honma at (910) 457-2741.

Sincerely,

G. D. Hicks
