) Docket No. 50-333

APPLICATION FOR AMENDMENT TO
OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission (NRC), the Power Authority of the State of New York, as holder of Facility Operating License No. DPR-59, hereby applies for an Amendment to the Technical Specifications contained in Appendix A of this license.

This proposed change to the James A. FitzPatrick Operating License seeks to amend Section 3.6.D (Coolant Leakage) on pages 141, 141a and 142 of Appendix A. The changes proposed impose stricter limitations on leakage rates from unidentified sources inside the primary containment.

In accordance with the NRC's letter dated April 13, 1984, these proposed changes supercede and replace changes previously proposed in the Authority's September 28, 1981 submittal.

The proposed changes to the Technical Specifications are presented in Attachment I to this Application. The Safety Evaluation is included in Attachment II.
