SUBJ: Justifications for Interim
Operation - Seismic Qualification

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

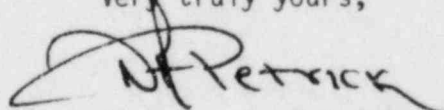

Docket Nos.: STN 50-482 and STN 50-483

Reference: SLNRC 84-0120, dated October 9, 1984: Same Subject

Dear Mr. Denton:

The reference letter provided a revised Justification for Interim Operation (JIO) applicable to the Operator Interface Modules (ESE-12A) at the SNUPPS plants, Cailaway Plant Unit No. 1 and Wolf Creek Generating Station Unit No. 1. In telephone conversations with the NRC staff regarding this JIO, the potential for impact on plant operations was discussed. In order to assure that the SNUPPS plant staffs are aware of this operational concern, the plant operating staffs were apprised (by letter dated October 11, 1984) of the JIO and the potential requirement to use alternate methods to accomplish the functions normally provided by the Operator Interface Modules.

Very truly yours,

Nicholas A. Petrick
