BILLY R. CLEMENTS  
VICE PRESIDENT, NUCLEAR OPERATIONS

July 25, 1984

Mr. B. J. Youngblood, Chief  
Division of Licensing  
Licensing Branch No. 1  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION  
DOCKET NOS. 50-445 AND 50-446  
TECHNICAL SPECIFICATION FOR THREE (N-1) LOOP OPERATION

Dear Mr. Youngblood:

The proposed technical specifications for Comanche Peak Unit 1 are being reviewed for issuance by the Staff. Texas Utilities Generating Company does not wish to have Comanche Peak licensed for three-loop operation and requests that all references to three-loop operation be deleted from the Technical Specifications.

We are concerned that Technical Specification references to an unapproved mode of operation could lead to confusion by our personnel. If there is anything my staff can do to assist in this matter, please let me know.

Sincerely,

*Richard E. Kahler*

for B. R. Clements
