Docket Numbers 50-369 and -370  
Catawba Nuclear Station  
Docket Numbers 50-413 and -414  
Revisions to Technical Specification Listings of Core Operating  
Limit Methodologies; Supplement

By letter dated September 1, 1995, Duke Power Company submitted proposed revisions to Technical Specification 6.9.1.9 for McGuire and Catawba Nuclear Stations, which will reference updated or recently approved methodologies used to calculate cycle-specific limits contained in the Core Operating Limits Report. Discussions with the NRC staff identified discrepancies in two of the topical report identifiers. In addition, for Catawba, amendment numbers 134 (Unit 1) and 128 (Unit 2), issued August 31, 1995, resulted to a change to one of the pages provided in the September 1, 1995 submittal. Therefore, new originals are hereby provided for the affected pages.

If there are any questions, or more information is needed, please call Scott Gewehr at (704) 382-7581.

Very truly yours,

*M. S. Tuckman*
