Director of Nuclear Reactor Regulation
Attention: Mr. G. W. Knighton, Chief
Licensing Branch No. 3
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

SUBJECT: WATERFORD 3
DOCKET NO. 50-382
ENVIRONMENTAL QUALIFICATION

Reference: LP&L Letter W3P-84-0249 dated 2/10/84

Dear Sir:

The referenced letter submitted to you the Index of Qualification Status/
Punchlist Items which was dated February 6, 1984. At that time, a number of
equipment had to be replaced, relocated, some confirmatory data was missing and
also some field verification was pending.

Attached herewith is an updated version of that list dated October 17, 1984.

The following items still remain open:

<u>Item</u>	<u>Status</u>
3.1W3 (Sheet 2137)	Limit and torque switch change-out is complete. Appropriate CIWA is closed and will be incorporated in file by 10/19/84.
8.2W3 (Sheets 222, & 223)	Foxboro transmitters need to be changed-out. The scope of the work is identified in SMR-84-284.
8.4W3	File cannot be completed until CE submits the report for Ex-Core Neutron Flux Monitoring System. Report is expected by 10/26/84.
35.1W3 (Sheets 1217-1219)	Identification of solenoid is difficult because of the presence of insulation. Available documentation to verify the correct model number will be incorporated in the EQ file by 10/19/84.

PDR ADOCK 05000382
A PDR

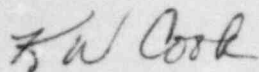

cool
1/1

October 18, 1984
W3P84-2876

<u>Item</u>	<u>Status</u>
42.3W3	File cannot be completed until Borg-Warner completes the qualification testing and submits the final report. This submittal is expected by May, 1985.

A complete Index will be submitted to you once all of the required information is obtained.

Yours very truly,

K. W. Cook
Nuclear Support & Licensing Manager
