Reference: Oregon State University TRIGA Reactor (OSTR), Docket No. 50-243, License No. R-106

In accordance with section 6.7.e of the OSTR Technical Specifications, we are hereby submitting the Annual Report of the Oregon State University Radiation Center and TRIGA Reactor for the period July 1, 1994 through June 30, 1995. Please note that we are also using this letter of transmittal to send copies of the current report to Mr. Al Adams, OSTR Senior Project Manager, USNRC, Washington, DC; and to the USNRC's Region IV office.

The 1994-95 annual report continues the pattern established over the past few years and includes information about the entire Radiation Center rather than concentrating primarily on the reactor. Because the report addresses a number of different interests, it is rather lengthy, but we have incorporated a short executive summary which highlights the Center's activities and accomplishments over the past year.

A reading of the executive summary will soon communicate the fact that the Radiation Center has had yet another successful and productive year. We hope that you will find the current report to be informative and interesting. Should there be any questions, please let me know.

Cordially,

Brian Dodd
Director
