Dear Mr. Youngblood:

Reference: (1) Fermi 2
NRC Docket No. 50-341

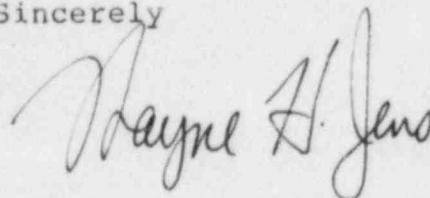

Subject: Amended Physical Security Plan

This letter transmits six (6) copies of Amendment 5 of the Fermi 2 Physical Security Plan. This amendment reflects adoption of the Vital Island concept described in NUREG 0908. In addition, an updated site description and organizational changes are reflected in this amendment.

The definition of the vital islands described in the plan was discussed between members of Detroit Edison staff and NRC reviewer Mr. Steve Brown of the Nuclear Materials Safety and Safeguards Division prior to amending the plan.

Your expedited review is requested. Should it prove helpful, Detroit Edison would be happy to discuss the revised plan in a meeting at the NRC's convenience.

Sincerely

cc: Mr. P. M. Bryon*
