Subject: Final 10CFR50.55(e) Report; Inadvertent Closure of Brown Boveri
5 kV Circuit Breakers

Dear Sir:

Reference (c) reported a 10CFR50.55(e) deficiency regarding inadvertent closure of Brown Boveri 5 kV circuit breakers. The corrective action recommended by the manufacturer was the installation of a close-latch anti-shock spring to the circuit breakers to eliminate the possibility of inadvertent closure. The installation of these springs has been completed for the Unit 1 circuit breakers. The springs were installed on the Unit 2 circuit breakers by the manufacturer during their assembly.

This completes the corrective action and, therefore, we consider this the final report on this 10CFR50.55(e) deficiency.

Very truly yours,

John DeVincentis, Director
Engineering and Licensing
