

SOUTH CAROLINA ELECTRIC & GAS COMPANY

POST OFFICE 764

COLUMBIA, SOUTH CAROLINA 29218

O. W. DIXON, JR.  
VICE PRESIDENT  
NUCLEAR OPERATIONS

July 31, 1984

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Subject: Virgil C. Summer Nuclear Station  
Docket No. 50/395  
Operating License No. NPF-12  
Operating License Condition 2.C.7

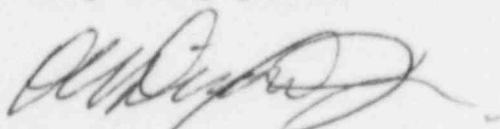

Dear Mr. Denton:

In response to Virgil C. Summer Nuclear Station Operating License Condition 2.C.7, the following information is provided. South Carolina Electric and Gas Company (SCE&G), by letter from O. W. Dixon, Jr. to Harold R. Denton, dated September 29, 1982, provided a summary of the analysis performed justifying continued operation with the thermal sleeves removed from selected nozzles in the reactor coolant system. This justification has since been supported by a Westinghouse letter (Proprietary) from E. P. Rahe to R. H. Vollmer, "Design Transients Related to Thermal Sleeve Removal," NS-EPR-2763, dated May 9, 1983.

SCE&G considers submittal of the above described documents to the Staff sufficient to meet the requirements of License Condition 2.C.7.

Should you have any further questions, please advise.

Very truly yours,

O. W. Dixon, Jr.
