

Docket Number 50-346
License Number NPF-3

October 31, 1995

To: Linda Gundrum, Davis-Besse Nuclear Power Station Project Manager,
Nuclear Regulatory Commission

From: Dale R. Wuokko, Supervisor - Nuclear Regulatory Affairs Unit, Davis-
Dale R. Wuokko Besse Nuclear Power Station

Subject: Inadvertent Omission of the Deletion of Technical Specification
(TS) 6.9.2.d. "Seismic event analysis" Made During the Submission
of License Amendment Request (LAR) 95-0012

LAR 95-0012 (Toledo Edison Letter, Serial Number 2295, dated June 23, 1995) proposed a modification to the Davis-Besse Nuclear Power Station (DBNPS) Operating License NPF-3, Appendix A Technical Specifications to relocate TS 3/4.3.3.3 - Seismic Instrumentation, TS 3/4.3.3.4 - Meteorological Instrumentation and TS 3/4.4.11 - Reactor Coolant System Vents and their Bases.

TS 6.9.2.b - Inoperable Seismic Monitoring Instrumentation, and TS 6.9.2.c - Inoperable Meteorological Monitoring Instrumentation, Special Report, were proposed for deletion from the Technical Specifications due to the removal of TS 3/4.3.3.3 and TS 3/4.3.3.4 from the Operating License. TS 6.9.2.d - Seismic Event Analysis should also be deleted from the Technical Specifications (as shown in the attached marked up copy of TS page 6-18) due to the relocation of specification 4.3.3.3.2. This proposed deletion was inadvertently omitted from LAR 95-0012.

Please include the requested deletion of TS 6.9.2.d as part of LAR 95-0012. The deletion of TS 6.9.2.d will not affect the conclusion in LAR 95-0012 that the proposed changes do not involve a significant hazards consideration. The deletion of TS 6.9.2.d from the Technical Specifications does not constitute an unreviewed safety question.

Please accept our apology for any inconvenience this may have caused.
