- 2) Detroit Edison Letter NRC-94-0013, Reply to a Notice of Violation (No. 50-341/93022-01), dated March 11, 1994

Subject: Changes in the Corrective Action Program

Reference 2 responded to Notice of Violation 93-022-01 for Corrective Action Program problems. The purpose of this letter is to inform the NRC of the deletion of two commitments made by reference 2.

The commitments being deleted are:

- 1) The formal documented program of periodic assessments of Deviation Event Reports (DER) effectiveness review by managers and organizational unit heads as described in item 1 on page 5 of reference 2.
- 2) The formal documented review of effectiveness of corrective actions described in item 2 on page 5 of reference 2. This review was being accomplished by organizational unit personnel who were originally responsible for the DER evaluation.

NRC-95-0066  
Page 2

These formal documented assessments and reviews were determined to be unduly burdensome and unnecessary considering the other actions taken to review DERs.

Follow-up verifications will continue to be performed by the Safety Engineering organization. Item 2 on page 3 and item 5 on page 5 of reference 2 will continue to be performed. In addition, this letter includes the following new commitment: A sampling of DER's periodically selected randomly will be reviewed for effectiveness by safety engineering personnel.

If you should have any questions please contact Joseph M. Pendergast, Compliance Engineer at (313) 586-1682.

Sincerely,
