Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNIT NOS. 1 AND 2
REVISION TO PROPOSED TECHNICAL SPECIFICATION CHANGES

By our letter dated December 15, 1983 (Serial No. 707), we proposed Technical Specification changes for North Anna Unit Nos. 1 and 2. The proposed changes were to revise Technical Specification 3.0.3 and the Bases related to Technical Specification 3.0.3.

In our previous submittal, we proposed changes that were hybrid in nature to the Standardized Technical Specifications (STS) for Westinghouse Pressurized Water Reactors. The lead-in to the action statement time requirements for Technical Specification 3.0.3 was different than the STS and our basis for the changes was that the changes conformed with NRC regulations.

The purpose of this letter is to revise our previous submittal to be completely consistent with the STS for North Anna Unit Nos. 1 and 2 Technical Specifications 3.0.3 and the Bases related to Technical Specifications 3.0.3. The proposed Technical Specification changes for North Anna Unit No. 1 are provided in Attachment 1. The proposed changes for North Anna Unit No. 2 are provided in Attachment 2. A discussion of the proposed Technical Specification changes is provided in Attachment 3.

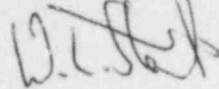

This revised request has been reviewed and approved by the Station Nuclear Safety and Operating Committee and the Safety Evaluation and Control Staff. It has been determined that this revised request does not involve an unreviewed safety question as defined in 10 CFR 50.59 and does not pose a significant hazards consideration as defined in 10 CFR 50.92.

Since this letter revises our previous submittal and licensee amendment fees were submitted with the previous submittal, no additional license amendment fees should be required.

Very truly yours,

W. L. Stewart
