Subject: Request to Correct NRC Error in License Amendment Number 162
(TAC No. M75518)

Gentlemen:

On September 4, 1991, the Nuclear Regulatory Commission (NRC) issued Amendment Number 162 (Toledo Edison Log Number 3550) to Facility Operating License Number NPF-3 for the Davis-Besse Nuclear Power Station Unit Number 1. This was in response to Toledo Edison's application dated February 1, 1990 (Serial Number 1750). The amendment revised Technical Specifications 3/4.1.3.1, 3/4.1.3.2, 3/4.1.3.3, and 3/4.1.3.4 regarding control rod assembly position indication surveillance requirements and made some administrative corrections. Technical Specification Bases 3/4.1.3 was also changed to provide a discussion of the revised surveillance requirements.

In revising Bases page B3/4 1-4, the NRC deleted a portion of the existing Bases in a paragraph that should have been unaffected by Amendment Number 162. Attachment 1 is marked up to show the correction necessary for page B3/4 1-4. Attachment 2 shows the wording as it existed prior to Amendment Number 162. Toledo Edison requests that the NRC issue a corrected page B3/4 1-4.
