

Docket No. 50-346
License No. NPF-3
Serial No. 1061
August 4, 1984

RICHARD P. CROUSE
Vice President
Nuclear
(419) 259-5221

Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz
Operating Reactor Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Stolz:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1.

This application requests that the Davis-Besse Nuclear Power Station Unit 1 License NFP-3 Appendix A, be revised to reflect the changes attached.

The attachment identifies the change, Safety Evaluation and Significant Hazards Consideration for the Integrated Living Schedule Plan (ILSP).

The proposed amendment would: 1) optimize the allocation of TED and NRC resources among those activities necessary to assure the continued safe, reliable and economic operation of Davis-Besse; and 2) achieve the appropriate balance and prioritization between TED initiated activities and NRC required activities, thereby providing a rational basis for planning, scheduling and implementing necessary plant betterment projects at the Davis-Besse Nuclear Power Station.

This amendment request involves a change to the License. Enclosed is a check for \$150 as requested by 10CFR170.12.

Very truly yours,

Attachment
