License No. 19-00915-03  
Docket No. 030-04530

This is to clarify the program codes and license category used by NRC for the USDA NRC License 19-00915-03. The USDA has decreased the number of radioactive material use locations authorized by NRC license 19-00915-03. We now do not have more than 20 authorized use locations using sealed radioactive sources and not more than 20 authorized use locations using sealed radioactive sources. The USDA will request an amendment to our NRC License (19-00915-03) if we need to authorize more than 20 locations to use either unsealed radioactive materials or sealed radioactive sources.

Please contact me on 301-504-2441, if you have any questions.

Sincerely,

John T. Jensen  
Chief
