United States Nuclear Regulatory Commission
Attention Document Control Desk
Washington, DC 20555

Dear Sir:

SUBJECT: Oyster Creek Nuclear Generating Station
Docket 219
Status of George Scienski, License No. OP 10809

Mr. George Scienski, License No. OP 10809, Docket No. 55-61238, participated in GPU Nuclear's Resident Student Program attending the New Jersey Institute of Technology graduating in May, 1995, with a Bachelor of Science Degree in electrical engineering.

Mr. Scienski has accepted a supervisory position within the Operations Department and is presently enrolled in the NRC Senior Reactor Operator License Upgrade Program. Additionally, he has completed all of the requirements for restoring his Reactor Operator license with the exception of the requirements of 10 CFR 55.53(f)(2). Due to his participation in the Upgrade Program, GPU Nuclear has determined that it is unnecessary for George to activate his license at this time, however, a request for renewal was sent to you on October 25, 1995. It is GPU Nuclear's intention for George's license to remain inactive until he completes his SRO Upgrade Program in April, 1996. We will keep you advised of any changes in this matter.
