Office of Nuclear Reactor Regulation
Attn: Mr. John F. Stolz, Chief
Operating Reactors Branch No. 4
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Response to NRC Staff's Request for Changes to
Technical Specification Change Request No. 115

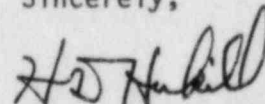

Technical Specification Change Request 115 was submitted June 4, 1984. Review by the NRC Staff has resulted in a request to make the following changes in our submittal:

1. Per teleconference with Owen Thompson on July 6, 1984, GPUN has agreed to add phases for clarification to T.S. 6.16 Post-Accident Sampling Programs.
2. Per teleconferences with Dominick DiIanni on various dates, GPUN has agreed to expand on the remark on Table 4.1-1 Instrument Surveillance Requirements, item 2. Control Rod Drive Trip Breaker.

These changes incorporate wording preferred by the Staff to the wording in original submittal and do not affect the intent of previously submitted Request.

The reviewed pages have been included for your convenience.

Sincerely,

H. D. Hukill
Director, TMI-1
