ULNRC-3288

Gentlemen:

DOCKET NO. 50-483
CALLAWAY PLANT -- OPERATING QUALITY ASSURANCE MANUAL
(OQAM), REVISION 18

Reference: 1) ULNRC-3015 to Region III, dated June 7, 1994; OQAM, Revision 17

Reference: 2) ULNRC-3276 to Region IV, dated October 20, 1995; OQAM CN #95-04 --
Incorporating ORC/NSRB Review and Audit Requirements from Technical
Specifications to the OQAM

Reference: 3) ULNRC-3281 to NRR, dated October 23, 1995; Revision to Technical
Specification 6.0, Administrative Controls

Furnished herewith for your review and approval is Revision 18 of the Callaway Plant OQAM. Pursuant to the requirements of 10CFR50.54 and 10CFR50.71, the OQAM has been revised to incorporate changes since the last docketed revision transmitted via Reference 1.

We have enclosed one copy of the following documents::

- 1) OQAM Revision 17 mark-up, identifying changes through the use of inserts, added pages and strikeovers.
- 2) Description of and Justification for Proposed Changes to OQAM in Revision 18.
- 3) Updated pages which constitute OQAM Revision 18.

OQAM Revision 18 incorporates changes transmitted to NRR via Reference 3 regarding relocation of ORC/NSRB review and audit requirements from the Technical Specifications to the OQAM. We have transmitted an information copy of these changes to NRC Region IV (Reference 2).

Q004.11

ULNRC-3288

OQAM Revision 18 has been evaluated and we conclude that it does not reduce commitments previously accepted by the NRC. OQAM Revision 18 continues to satisfy the requirements of 10CFR50, Appendix B.

Union Electric will consider OQAM Revision 18 effective upon NRR approval of the revised Technical Specification application (Reference 3). The application included *draft* pages of the OQAM to illustrate where ORC/NSRB review and audit requirements would be incorporated.

If you have any questions, please contact us.

Very truly yours,

Donald F. Schnell
