Ms. Joyce L. Tichler
Analytical Sciences Division
Brookhaven National Laboratory
Upton, NY 11973

Dear Ms. Tichler:

As requested by your letter dated February 14, 1992, CP&L has reviewed Brookhaven National Laboratory's (BNL) summary data regarding radioactive effluents released by the Brunswick Steam Electric Plant (BSEP) for 1990. Corrections and/or comments to the report are indicated by handwritten notes on the enclosed copy of the report. CP&L understands that this summary data is to be used for inclusion in the BNL report of radioactive effluents released from commercial nuclear power plants during 1990 which is being prepared under contract with the Nuclear Regulatory Commission.

Also, your letter requested that CP&L indicate whether volumes reported were before or after compaction when solid waste was shipped to a licensed waste processor for volume reduction. Please note that all volumes reported were after compaction.

Thank you for the opportunity to review and comment on the summary data prior to finalization of the BNL report. If you have any questions, please call Mr. M. R. Oates at (919) 546-6063.

Yours very truly,

M. R. Oates
